

Tips to play the slope fairways of Arabella

When playing a downhill make sure to do the following adjustments on setup to insure a good strike:

1. Move the ball a few inches back in the stance

2. Feel your whole body aligned with the slope with your hips and shoulders on the same angle as the downslope.

3. Feel the weight on the left leg

4. Try and hit a little more down onto the ball

5. Finish with all your weight on the left side.

6. Use more loft

When finding yourself on a fairway sloping uphill make sure to:

1. Move the ball slightly forward in your stance

2. Feel your left hip and shoulder higher than your right

3. Get more weight on your right leg during setup

4. Feel that you are swinging up with the angle of the slope

5. After the shot you need to feel the sensation of hanging back.

6. Use less loft
